

# UCC-1 Filing Automation Project

## Project Overview

The UCC-1 Filing Automation project aims to automate the intake, validation, verification, and status management of UCC-1 filings submitted by clients through email. The solution is designed to reduce manual effort, improve processing efficiency, and ensure compliance with regulatory requirements.

## Project Objectives

- Automate UCC-1 filing intake
- Reduce manual processing effort
- Improve processing accuracy
- Enable automated status tracking
- Improve compliance monitoring

## Project Scope

The system will automate email intake, document extraction, data validation, loan agreement verification, exception handling, and notification management.
